

**SATELLITE RADIO RECEIVER THAT DISPLAYS INFORMATION
REGARDING ONE OR MORE CHANNELS THAT ARE NOT CURRENTLY
BEING LISTENED TO**

ABSTRACT OF THE DISCLOSURE

5 A satellite radio receiver includes a display that displays information regarding
one or more channels that are not currently being listened to. For a music channel, this
information may include the name of the artist, the song title, time left in the song, etc.
For a news channel, this information may include the news currently being discussed, the
name of the news program, the time remaining, etc. For a sports channel, this
10 information may include the name of the channel, a description of the sporting event, the
time remaining, etc. The preferred embodiments include different ways to select which
channels are “favorites” and therefore displayed on the display. One way is to select one
or more channels that are assigned to preset buttons on the radio receiver. Another way is
to keep track of which channels are most frequently listened to, and to display
15 information regarding those channels. The preferred embodiments extend to any and all
mechanisms for displaying information regarding one or more channels that are not
currently being listened to.
